

# CURRENT LIST of MEDICAL LITERATURE

Vol. 17

July 1, 1949

No. 1

## Subject Groups According To Journals

- |  |   |
|--|---|
| 1. Allergy                             | 26. Infectious Diseases                             |
| * 2. Anatomy; Histology                | * 27. Medicine                                      |
| * 3. Anesthesia                        | * 28. Military and Naval Medicine                   |
| 4. Anthropology                        | 29. Miscellaneous                                   |
| 5. Aviation Medicine                   | 30. Musculoskeletal System                          |
| * 6. Bacteriology; Parasitology        | * 31. Neurology; Psychiatry                         |
| * 7. Biology                           | * 32. Nursing                                       |
| 8. Cancer                              | * 33. Nutrition                                     |
| * 9. Cardiovascular System             | * 34. Ophthalmology                                 |
| * 10. Chemistry; Physics               | * 35. Otorhinolaryngology; Phoniatry                |
| * 11. Dentistry; Stomatology           | * 36. Pathology                                     |
| * 12. Dermatology                      | * 37. Pediatrics; Child Welfare                     |
| * 13. Diagnosis; Clinical Methods      | * 38. Pharmacology                                  |
| * 14. Digestive System                 | * 39. Physiology                                    |
| * 15. Endocrinology                    | * 40. Psychology                                    |
| 16. Forensic Medicine; Toxicology      | * 41. Public Health; Epidemiology                   |
| * 17. Genetics; Eugenics               | * 42. Radiology                                     |
| 18. General                            | 43. Respiratory System                              |
| * 19. Geriatrics                       | * 44. Surgery, General                              |
| * 20. Gynecology; Obstetrics           | * 45. Therapeutics                                  |
| * 21. Hematology                       | 46. Tropical Medicine                               |
| * 22. History; Bibliography; Biography | * 47. Tuberculosis                                  |
| * 23. Hospitals                        | * 48. Urology                                       |
| 24. Immunology; Serology               | 49. Venereal Diseases (see also<br>12. Dermatology) |
| * 25. Industrial Medicine              | * 50. Veterinary Medicine                           |

THE ARMY MEDICAL LIBRARY

Washington, D. C.

**THE ARMY MEDICAL LIBRARY  
PHOTODUPLICATION SERVICE**

The purpose of photoduplication is to extend the services of the Library to those at a distance who cannot come in person to consult its collections. In the case of the Army Medical Library it provides an economical and efficient means of contributing more largely to the advancement of medicine and the public welfare.

In order that photoduplication may render the greatest possible aid to those engaged in medical research, the following policies in regard to its conduct will be observed:

1. The Library will lend without charge single microfilm copies of original articles published in medical periodicals not available locally. Such loan requests should be routed through libraries, governmental agencies, or research institutions. The microfilm, being part of the duplicate collection of the Library may be used for ninety days and will be returned to the Library at the end of the loan period.
2. Requests for microfilms and photoprints for official business in the Department of Defense will be filled free of charge.
3. Microfilms will also be sold to those desiring to retain them, at a rate of 50 cents for each 50 pages or fraction thereof from a single article.
4. For the benefit of those not having the facilities to read microfilms, photoprint copies of separate articles from periodicals will be supplied at a charge of 50 cents for each 10 consecutive pages or fraction thereof from a single article.
5. Except when the order is accompanied by the written permission of the copyright owner, The Army Medical Library will not reproduce books protected by copyright, or entire periodical issues.

**INSTRUCTIONS**

All requests, including those for free loans, must be submitted on Army Medical Library official order blanks (AML Form 48). A supply will be furnished on request.

All purchase orders must be accompanied by payment in cash, or by check or money order made payable to the Treasurer of the United States; or by Army Medical Library Coupons which may be ordered in any quantity from the Library at 50 cents each.

Federal agencies will be billed periodically by means of Standard Form 1080 (Voucher).

Refunds for material the Library is unable to supply will be made by coupons unless cash refund is specifically requested.

---

The **CURRENT LIST OF MEDICAL LITERATURE** is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: \$3.00 per year (\$3.75 foreign); 10 cents per single copy. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

Published weekly by the **ARMY MEDICAL LIBRARY**, 7th Street & Independence Ave., S. W., Washington 25, D. C., as an intraservice publication of the Department of the Army. Lists articles of medical interest contained in current journals received. Subject index provided monthly. Exchange invited.

## 2. Anatomy; Histology

*Acta anat.*, Basel, 1949, 7: No. 1-2

- VERLOOP, M. C. On the arteriae bronchiales and their anastomosing with the arteria pulmonalis in some rodents; a micro-anatomical study. 1-32.
- HITZIG, W. H. Ueber die Entwicklung der Schweineplacenta. 33-82.
- DI MAGGIO, G. Ueber die Anwendung von Alkyl-derivaten des Benzopyrrol bei einer neuen Färbemethode des reticulären Bindegewebes. 82-6.
- BROMAN, I. Ueber die Embryonalentwicklung der Blinddärme bei Procvavia: mit einer Einleitung über die bisherigen Versuche, das Homologie-Problem der Wirbeltier-Blinddärme zu lösen. 87-126.
- MATOLTSY, A. G. The extensibility of isolated myofibrils and the change in the cross striation during extension. 127-31.
- DEBRUNNER, H. U. Der funktionelle Bau der Atrioventrikularklappen des Menschen. 132-53.
- SWENSSON, Å. Faseranalytische Untersuchungen am Nervus trochlearis und Nervus abducens. 154-72.
- WRETE, M. The innervation of the shoulder-joint in man. 173-90.
- HINDERMANN, M. C. Wucherung und Adenombildung der Hodenzwischenzellen. 191-206.
- WEBER, W. Gehirnmissbildung bei einem Rinderföten. 207-12.

## 3. Anesthesia

*J. Am. Ass. Nurse Anesth.*, 1949, 17: No. 2 (May)

- WATROUS, W. G. The physiologic effects of anoxia. 105-16.
- ALLISON, M. L. Some physiologic responses affecting anesthesia. 117-24.
- SCHULL, L. Respiratory and cardiac emergencies during anesthesia. 125-30.
- MARTIN, R. C. Curare. 131-6.
- McQUILLEN, F. A. Cerebral manifestations of anoxia; a review of the literature. 137-73.

## 5. Bacteriology; Parasitology

*J. Gen. Microb.*, Lond., 1949, 3: No. 1 (Jan.)

- MAXTED, W. R. Occurrence of the M. substance of type 28 group A in streptococci of Lancefield groups B, C and G. 1-6.
- PROOM, H., & HEMMONS, L. M. The drying and preservation of bacterial cultures. 7-18.
- CALAM, C. T., & HOCKENHULL, D. J. D. The production of penicillin in surface culture, using chemically defined media. 19-31.
- TAYLOR, C. B., & COLLINS, V. G. Development of bacteria in waters stored in glass containers. 32-42.

- WHITEHEAD, H. R., & HUNTER, G. J. E. A note on morphological differences between strains of *Streptococcus cremoris*. 43-5, pl.
- BUTLIN, K. R., ADAMS, M. E., & THOMAS, M. The isolation and cultivation of sulphate-reducing bacteria. 46-59.
- FREEMAN, G. G., & MORRISON, R. I. Some biological properties of trichothecin, an antifungal substance from *Trichothecium roseum* Link. 60-8.
- COWAN, S. T., & SHAW, C. Outline classification of *Bacterium* and *Staphylococcus*. 69-73.
- BRODIE, J., & SHEPHERD, W. Further observations on the differential inhibition of coliform bacilli and rough variants of intestinal pathogens. 74-9, pl.
- SHATTOCK, P. M. F. The streptococci of group D; the serological grouping of *Streptococcus bovis* and observations on serologically refractory group D strains. 80-92.
- BISSET, K. A. Observations upon the cytology of *Corynebacteria* and *Mycobacteria*. 93-6, pl.
- FULTON, F., & DUMBELL, K. R. The serological comparison of strains of influenza virus. 97-111, pl.
- JEBB, W. H. H. The use of Nile blue in the study of tetrathionase activity. 112-6.
- SYKES, J. A., & REED, R. The control of the swarming of *Proteus vulgaris* by boric acid. 117-21, pl.
- PONTECORVO, G. Auxanographic techniques in biochemical genetics. 122-6, pl.
- GALE, E. F., & RODWELL, A. W. The assimilation of amino-acids by bacteria; the nature of resistance to penicillin in *Staphylococcus aureus*. 127-42, pl.
- MOORE, F. W. The utilization of pyridine by micro-organisms. 143-7.
- ROSS, H. E., WARREN, M. E., & BARNES, J. M. Clostridium welchii iota toxin; its activation by trypsin. 148-52.
- JAMES, A. Growth requirements of virulent and avirulent strains of *Haemophilus pertussis* in semisynthetic medium. Suppl., p. i.
- UNGAR, J., & MUGGLETON, P. The precipitability of *Haemophilus pertussis* strains with aluminum phosphate and its significance. Suppl., p. ii.
- BISSET, K. A. Morphological evidence in the taxonomy of the Coccaceae. Suppl., p. iii.
- BUTLIN, K. R., ADAMS, M. E., & THOMAS, M. The morphology of sulphate-reducing bacteria. Suppl., p. iii.
- DAVIS, J. G. A schematic classification for the lactic acid bacteria. Suppl., p. iv.
- CUNNINGHAM, A., WILSON, M. A., & McLEOD, D. H. A CO<sub>2</sub>-sensitive mastitis *Streptococcus*. Suppl., p. v.
- FOGGIE, A. Studies on tick-borne fever in sheep. Suppl., p. v.
- BUTLER, M., & HARRIS, G. C. M. A method for expressing numerically the morphological features of submerged cultures of fungi, with special reference to *Penicillium chrysogenum*, Q 176. Suppl., p. vi.
- DAVIS, J. G., RESUGGAN, J. C. L. [et al.] Bactericidal action of some quaternary ammonium compounds which contain more than one paraffinic chain. Suppl., p. vii.
- BROWN, A. M. The immunological relation between *Haemophilus pertussis* toxic filtrates and *Haemophilus pertussis* extracted toxin. Suppl., p. vii.
- LUMB, M. The detection and isolation of a new

- antibiotic from culture liquors of *Streptomyces griseus*. Suppl., p. viii.
- LOMINSKI, I. Susceptibility and resistance to staphylococcal infection. Suppl., p. ix.
- HOWIE, J. W. Some factors governing the formation of spores in *Bacillus anthracis*. Suppl., p. x.
- KING, H. K., & STEIN, J. Toxicity of disintegrated *Bacillus anthracis*. Suppl., p. x.
- KING, H. K., & MACCABE, A. F. The virulence-enhancement factor of gastric mucin. Suppl., p. xi.
- PINSENT, J. Molybdenum and formic dehydrogenase of bacteria. Suppl., p. xii.
- GLEEN, H. Some aspects of sulphur metabolism in soils. Suppl., p. xiii.
- MOORE, F. W. The action of micro-organisms on pyridine. Suppl., p. xiii.
- PROOM, H., & WOJOW, A. Group relationship between bacteria shown by amino-acid metabolism. Suppl., p. xiv.
- BAKER, F., NASR, H., & MORRICE, F. Microbial breakdown of structural starches in the digestive tract. Suppl., p. xv.
- MITCHELL, R. L., & TOSIC, J. Trace elements in rumen micro-organisms. Suppl., p. xvi.
- McQUILLEN, K., & MITCHELL, P. D. The bacterial surface; entry of amino acids. Suppl., p. xviii.
- MITCHELL, P. D., & VALYI-NAGY, T. Estimation of growth rate of a *Staphylococcus*. Suppl., p. xviii.
- DAWSON, I. M., & ELFORD, W. J. Electron microscope studies of the adsorption of certain viruses on fowl red cell membranes. Suppl., p. xix.

## 7. Biology

*Biol. Rev. Cambridge Philos. Soc.*, 1949, 24: No. 2 (Apr.)

- HANSON, J. The histology of the blood system in Oligochaeta and Polychaeta. 127-73.
- JACKSON, C. H. N. The biology of tsetse flies. 174-92.
- PRINGSHEIM, E. G. Iron bacteria. 200-45.
- CHAMBERS, R. Microsurgical studies on protoplasm. 246-65.
